EXPERIENCE / TECHNICAL PROJECTS

UX Designer, Government Portal Feb 2024 – Feb 2025
Ridge Meadows Chamber of Commerce Ridge Meadows, BC

- Revamped government information portal, reducing bounce rate by 40% and gaining 2x retention.
- Partnered with the director to define reconfiguration goals, leading the redesign of key interfaces that improved brand cohesion and increased user engagement by 25%.
- Researched emerging AI technologies and collaborated with leadership to design a strategic roadmap aligning AI initiatives with organizational goals.

UX Designer, Virtual Reality Video Game UI Feb 2023 – Nov 2024
Cybersnake X Vancouver, BC

- Created and optimized UI components for a VR dungeon shooter, enhancing in-game clarity, player feedback, and overall immersion in play testing.
- Designed 34 unique gameplay weapons and power up assets with animations.
- Iterated on UX design based on player feedback, ensuring accessibility and seamless gaming experience.

UX Design Lead, Virtual Reality Music Platform Jan 2021 – Apr 2021
Backstag3 Vancouver, BC

- Defined and implemented the virtual platform's UX framework, streamlining user interactions, leading to key development milestones.
- Led user behavioral research efforts (competitive audits, surveys, interviews), identifying key market opportunities.
- Reconfigured and developed the product website using Framer, increasing web traffic by 45%.

UX Designer & UX Researcher, Checkout Kiosk Apr 2022 – Dec 2022
Vancouver Tool Library Vancouver, BC

- Led a 5-person team in redesigning the website to meet modern UX standards, improving navigation and accessibility.
- Conducted comprehensive user research (journey maps, personas, interviews, storyboards), yielding actionable insights for the client.
- Designed and prototyped a kiosk app for self-service, reducing checkout times by 50% and improving tool circulation.

UX Designer, Website Redesign

March 2021 – Jan 2022

Tri-Continental Global Services

Vancouver, BC

- Performed competitive audits and conducted primary research to identify opportunities and presented data-driven design solutions.
- Designed and developed wireframes and interactive prototypes to streamline client website workflows.
- Built and optimized client websites using HTML, CSS, and JavaScript for enhanced performance and responsiveness.

ACCOMPLISHMENTS

Brandstorm | Guest Judge

2025

- Evaluated marketing and branding strategies with a focus on user experience, design aesthetics, and digital product usability
- Provided critical feedback on digital product prototypes, assessing user-centered design principles, accessibility, and visual storytelling
- Shared UX insights on best practices, design trends, and user journey optimization to align projects with industry standards

Eunoia UX Hackathon | Award Winner

2023

- Collaborated with a team of 4 to prototype award-winning website and mobile interface for stakeholders
- Communicated actionable strategy and insights from the UXR to stakeholders ensuring the vision wasn't blocked
- Created complex components for high fidelity prototype that won the approval of event judges
